

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

March 19, 2003      LB 608

LB 775 generally does work. However, I can't overstate the importance more of more disclosure. I can't overstate that if this amendment, AM0879, does not pass, that we will fully and completely slow the economy in Nebraska further. And let me explain why. I've heard that they get a lot of money, "they" meaning big business. And for anyone that has ever sat across the table from big business and tried to entice them to move to Nebraska, or to expand in Nebraska, you don't understand the benefit and the value of confidentiality. I've sat across from half a dozen companies looking at moving to Nebraska, and I didn't know who they were. They wouldn't disclose who they were, for very good reason. What they're doing is confidential. It's important to their business. It's important to the future and to the economy of their own particular business. Confidentiality is something we all prize in business. There are reasons why businesses install very sophisticated security systems, highly sophisticated video surveillance systems, and even security staff on site. It's...certainly it's to maintain the well-being of the people that work there, to protect against vandalism. But I'll tell you what the single most important reason we in business install and spend the kind of money that we do: to protect against other competitors. Now, Nebraska is in a worldwide economy. And I think we can all cite specific examples of LB 775 successes. In fact, I...in my small county of 19,000 people, we have four examples of why LB 775 works. I can tell you, those four companies have security, and they are concerned about disclosing information that's detrimental to their business. There's a saying going around, or, I think the president of Caterpillar Claas in Sarpy County...they make farm equipment, and they make combines, what's now Claas. and the president was asked, why are you spending so much money putting a big fence all around the property? He said,...it's costing them a great deal of money, and he said, it's to keep the "Deere" out. John Deere. So you see, people, confidentiality isn't something that, unless you deal with a worldwide economy, unless you're in business,...it's nice to talk about models and it's nice to talk about, we need to be able to tell our constituents exactly how much every company gets in refunds, when actually, as a matter of fact, you know how much they get. You can predict, if they spend \$3 million, if they create 30 jobs, then they receive credits from sales tax that they
